

COSMETIC CONSULTS

Cosmetic Consults are available for patients who want personalized recommendations to address a cosmetic concern and an opportunity to ask questions about recommended products/services.

Consults appointments are scheduled for 30 minutes with our Aesthetic Nurse. They are detailed and specific and, therefore, limited to a single area/issue. We recommend you choose the issue/area that is of greatest concern to you; other issues/concerns may be addressed as part of your treatment plan or, if necessary, a subsequent consult.

A Cosmetic Consult and test spot are required for all cosmetic laser procedures. The purpose of the consult is to provide information about the desired/recommended treatment, discuss relevant risks/side effects, and to clarify treatment expectations and outcomes. The “test spot” is performed both to give you a sense of what treatment is like and, should you decide to proceed, assist the Aesthetic Nurse in establishing appropriate settings.

A patient who is interested in either Latisse or Tri-Luma, but has neither purchased it in our office previously nor discussed it with a provider also must schedule an appointment or a cosmetic consult before either product can be prescribed and/or dispensed.

We require a non-refundable deposit of \$50 to schedule a consult. Half of this fee may be credited toward any purchase of cosmetic services package.
